## UNIT HEATERS

### MODEL UDAP — POWER VENTED, LOW STATIC, AXIAL FAN

- Sizes 30 – 125 certified for residential heating application
- Sizes 30 – 400 certified for commercial/industrial heating application
- 82 – 83% thermal efficient
- 50 – 60°F rise range
- T-CORE2® heat exchanger
- T-CORE2® single burner combustion system
- Compact – Control compartment houses all electrical components

| ITEM # | MODEL   | INPUT BTU/HR | OUTPUT MBH | MIN/MAX CFM | BLOWER/FAN SIZE (") | ROUND VENT DIA (") | WEIGHT/ LBS |

**NOTE:** Propane unit heaters available upon request — P.O.A.  
 Model UDAP in sizes 30-125 are approved for installation in attached residential garages/workshops under CSA International Requirement 10.96 – U.S. and CR96-0005 – Canada.

### MODEL UDAS — SEPARATED COMBUSTION, LOW STATIC, AXIAL FAN

- Sizes 30 – 125 certified for residential heating application
- Sizes 30 – 400 certified for commercial/industrial heating application
- 82 – 83% thermal efficient
- 50 – 60°F rise range
- T-CORE2™ heat exchanger
- T-CORE2™ single burner combustion system
- Compact – Control compartment houses all electrical components

#### The Advantage of Reznor Separated Combustion

The separated combustion system technology eliminates common “open flame” combustion problems such as contaminants in the indoor air, and negative building air pressure.

- Air for combustion is taken from outside the building, preventing dirt, lint, dust or other contaminants in the indoor atmosphere from being burned.
- The combustion air flow is unaffected by negative building pressure or wind which can cause nuisance shutdown.
- Only one building penetration, horizontal or vertical (see the illustration at right).
