### WHAT IS DUCTCAP®?

Plastic bag with an elastic band sewn on the open end.

### WHY USE DUCTCAP®?

- Mechanical Engineer Specifications call for unfinished ductwork to be covered
- To protect internal components from moisture, dirt and debris
- Indoor air quality
- Protect equipment warranty
- Allows for next or final connection to have a clean surface

### HOW DO YOU USE DUCTCAP®?

Pick the corresponding Ductcap® for your size pipe, then expand elastic and slide over pipe. Insulator can slide Ductcap® off, insulate pipe, and expand Ductcap® over insulated pipe. Slide Ductcap® off, shake it clean, put in box for future use and make next or final connection.

### SAVE ON LABOUR COST!

- Sliding Ductcap® on takes only seconds compared to duct taping poly on open ends
- Ductcap® slides right off with no adhesive residue
- Ductcap® is reusable

### SPECIFICATIONS

The Ductcap® cover is designed to protect the entire air handling system during construction. Using a Ductcap® cover on all unfinished ends helps prevent moisture, dirt particles, dust and debris from entering the air handling system. The reusable Ductcap® cover is designed to be installed by stretching the elastic band over the round branch or any other open end. No tape, screws or nylon ties are needed to secure the Ductcap® cover to the duct.
